Styling Solution

You must have gone through the [Complete HTML code](#).

Setting basic styling to webpage :

```
CSS :     body, html{
              height:100%;
              margin:0;
              font-size:16px;
              font-family:"Lato", sans-serif;
              font-weight:400;
              line-height:1.8em;
              color:#666;
          }
```

Classes for images :
- pimg1
- pimg2
- pimg3

Setting Background styling for images :

```
CSS :     .pimg1, .pimg2, .pimg3{
              position:relative;
              opacity:0.80;
              background-position:center;
              background-size:cover;
              background-repeat:no-repeat;
              background-attachment:fixed;
          }
```

❖ As you must have observed that every image was different as we know how background images are set i.e. by using **background-image** property.

Setting background images for pimg1 , pimg2 and pimg3

```css
CSS :        .pimg1{
               background-image:url('./img/image2.jpg');
               min-height:100%;
             }
             .pimg2{
               background-image:url('./img/image1.jpg');
               min-height:400px;
             }
             .pimg3{
               background-image:url('./img/image3.jpg');
               min-height:400px;
             }
```

Class for the text inside the image :
- ptext
- ptext also have a span having class = "border" for providing borders

Setting styling for text inside images :

```css
CSS :   .ptext{
               position:absolute;
               top:50%;
               width:100%;
               text-align:center;
               color:#000;
               font-size:27px;
               letter-spacing:8px;
               text-transform:uppercase;
             }
        .ptext .border{
               background-color:#111;
               color:#fff;
               padding:20px;
             }
        .ptext .border.trans{
               background-color:transparent;
             }
```

Sections for text after images :

```
CSS :      .section{
                text-align:center;
                padding:50px 80px;
            }

           .section-light{
                background-color:#f4f4f4;
                color:#666;
            }

           .section-dark{
                background-color:#282e34;
                color:#ddd;
            }

           @media(max-width:568px){
                .pimg1, .pimg2, .pimg3{
                 background-attachment:scroll;
                }
            }
```
